
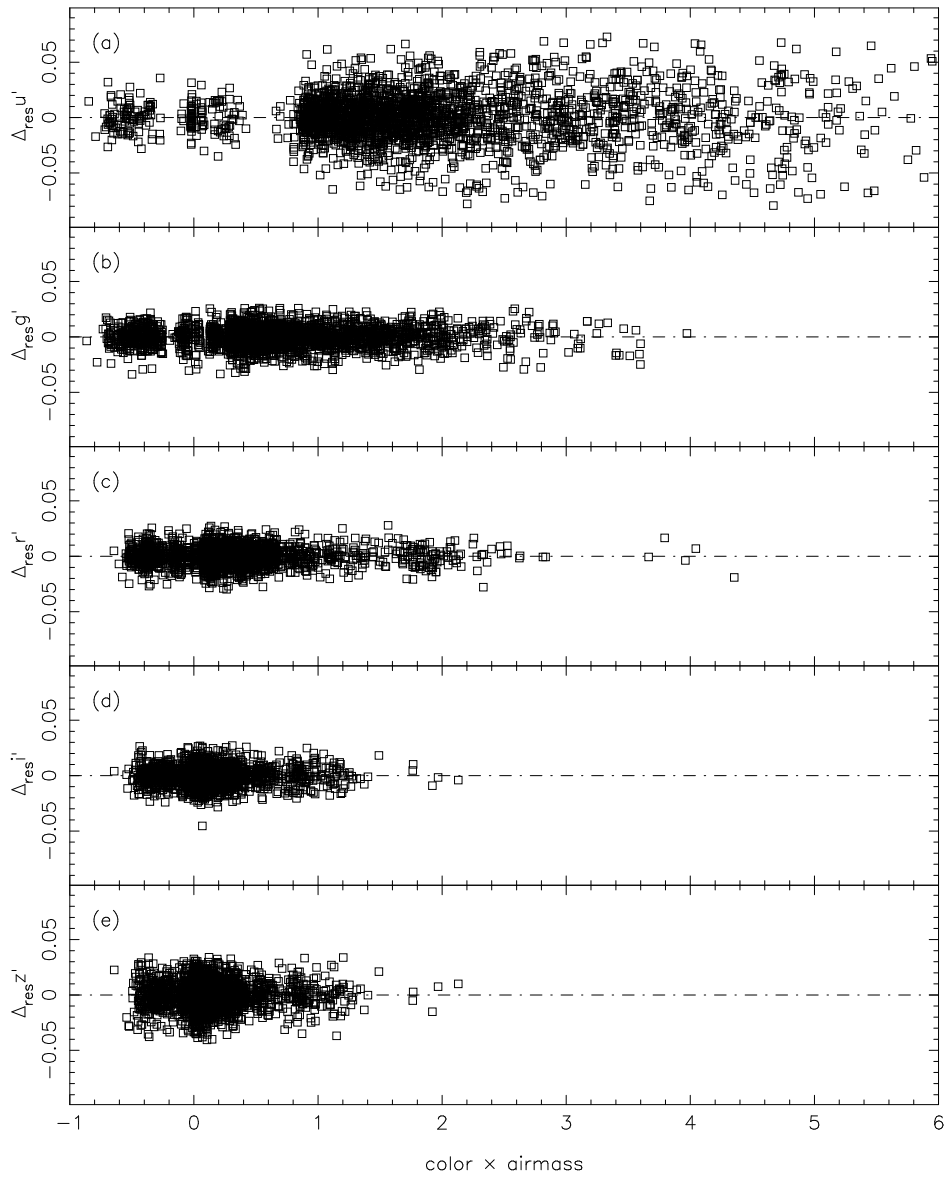

Fig. 11.— The residuals in the network solution plotted as a function of color times airmass ($\Delta_{\rm res}u'$ vs. $(u'-g')\times X$, $\Delta_{\rm res}g'$ vs. $(g'-r')\times X$, $\Delta_{\rm res}r'$ vs. $(r'-i')\times X$, $\Delta_{\rm res}i'$ vs. $(i'-z')\times X$, $\Delta_{\rm res}z'$ vs. $(i'-z')\times X$). No trends are apparent in the solution.
